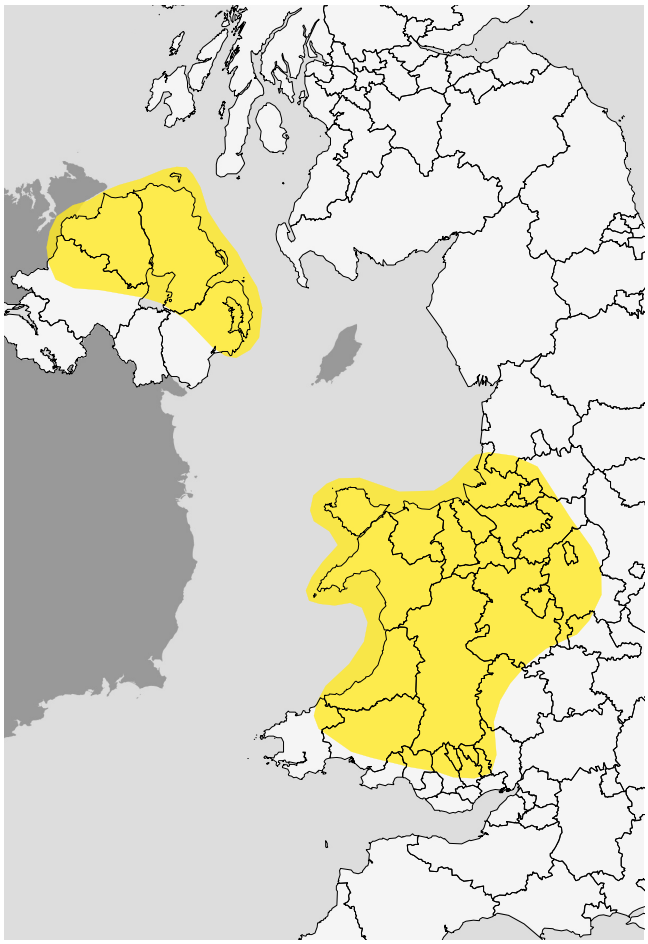
Yellow warning
Ice

Between
16:00 Thu 9 Jan 2025 and
10:00 Fri 10 Jan 2025



Scattered wintry showers may lead to some icy patches and travel disruption.

What to expect

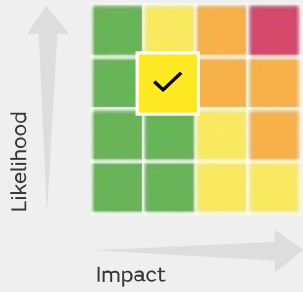
- Probably some icy patches on some untreated roads, pavements and cycle paths
- Some injuries from slips and falls on icy surfaces

Further details

Scattered wintry showers on Thursday evening will slowly fade overnight, leading to the risk of icy patches on untreated surfaces as temperatures fall below freezing. Isolated snow accumulations of 2-4 cm will be possible, more especially in Wales on hills above 150m elevation.

What should I do?

Keep yourself and your family safe when it is icy. Plan to leave the house at least five minutes earlier than normal. Not needing to rush, reduces your risk of accidents, slips, and falls.



Medium likelihood of low impacts

Issued at 10:57 Thu 9 Jan, 2025

Yellow warning
Ice

Between
16:00 Thu 9 Jan 2025 and
10:00 Fri 10 Jan 2025

Further Details (continued)

If you need to make a journey on foot, try to use pavements along main roads which are likely to be less slippery. Similarly, if cycling, try and stick to main roads which are more likely to have been treated.

Give yourself the best chance of avoiding delays by checking road conditions if driving, or bus and train timetables, amending your travel plans if necessary.

Be prepared for weather warnings to change: when a weather warning is issued, the Met Office recommends staying up to date with the weather forecast in your area.
